Gray Davis
Governor

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website at www.swrcb.ca.gov/rwqcb8.

April 2001

Applicant: City of Hemet – Juan Perez

Agent: Glenn Lukos Associates – David Moskovitz

Project Name: Brubaker Park Utility Line Crossing

Receiving Water: Unnamed drainage, tributary to Salt Creek

Project Description: The proposed project involves the development of a utility line crossing within a drainage ditch. The proposed project involves the excavation of an 18-inch-wide by 5.5-foot-deep utility trench adjacent to a concrete culvert. This trench will be filled with slurry backfill with electrical conduit, water conduit, and a sleeve for future conduits. After placement of the conduit and slurry backfill within the trench, a 4.5-foot-wide concrete slab will be placed over the proposed trench for erosion protection. For additional erosion protection, a 12-inch minimum size of rip-rap will be placed at the base of the concrete slab.

The proposed project is adjacent to Brubaker Park at the southeast corner of the intersection of Harrison Avenue and Cawston Avenue in the City of Hemet. The proposed project would permanently impact less than 0.01 acres of Corps jurisdiction. No additional mitigation is proposed for this project.
